(54) Title: **NEW PROCESS 1**

(57) Abstract: The invention refers to a process for the preparation of a self-dispersing or self-emulsifying tablet comprising the steps mixing a granulation medium containing an active lipophilic substance with one or more fillers and auxiliary components, granulation of said mixture into granules, drying of said granules, sieving of the granules into a homogeneous size, mixing of the granules with tableting aids, and compressing said mixture into tablets, which is characterised in that the granulation medium comprises an oil, a surfactant and a polar liquid. The invention also refers to a process for the preparation of tablets from a granulation medium comprising oil and surfactant, as well as to tablets prepared by said processes.
